

How strong is the wind?

Task

For each effect caused by the wind, write in the number of the corresponding wind force.

Wind force	Effect of the wind on land
6	You can hear the wind whistling in telephone wires.
8	Strong resistance when walking against the wind.
10	Trees are uprooted.
3	Leaves and twigs move.
12	Severe damage to houses and plants in nature.
5	Small leaf trees start to sway.
11	Cars and roofs are blown away.
4	Small branches move.
0	No air movement, smoke rises vertically.
9	Minor damage to roofs and houses, branches break off.
7	Slight resistance when walking against the wind.
1	Smoke blows in the direction of the wind.
2	Wind can be felt in the face.
