

## Structure of the ear (M/HS)

Current as of: February 29, 2016

- Journey into the world of Hearing (en, fr and other languages):  
Very detailed English and French information about hearing. This site is highly recommended for the animation showing damage to hair cells caused by noise.  
<http://www.cochlea.org/en/>
- Hearcom.eu (de, en):  
The structure of the ear is illustrated and explained very clearly using examples from the students' world.  
<http://hearcom.eu/main/Informationonhearing/Howwehear.html>
- "Planet Schule: Wissenspool total phenomenal 'Super ears'"  
These films show how hearing works for humans and animals. It also explains the meaning of hearing in daily life, for example, for communication.  
<http://www.planet-schule.de/wissenspool/total-phaenomenal-sinne/inhalt/sendungen/super-ears.html>

Note: On the Web you will find many pages with audio examples that demonstrate a hearing loss. To find such examples, you can enter the terms "hearing loss" and "demo" into a search engine.
