

Name: _____ Class: _____ Date: _____

Big data – Data tracks

Assignment A

Think about which web services or apps you use on a normal school day. In the appropriate place in the table, enter only those services or apps for which data are collected and data tracks are created. Also think about the types of data that are collected.

	Activity – What are you doing?	Service – What do you use to do it?	Data tracks – What data are collected?
In the morning to noon			
At home	e.g., checking the weather	e.g., weather app (location services)	e.g., place (of residence), time
On the way to school			
At school			
In the afternoon			
While doing homework			
Alone or with friends in your free time			
In the evening			
At home			
Before going to bed			

Assignment B

Choose three of your activities from the table. How can you carry out these activities without the service or app so that you do not leave any data tracks behind? Write down key points. Discuss your examples in class.
